PROJECTS

Weather Dashboard

GitHub: <https://github.com/RyanTheScholar/Weather-App>

Website: <https://ryanthescholar.github.io/Weather-App/>

Languages: JavaScript, HTML, CSS

Description: Used third-party APIs to pull weather data onto the dashboard, uses local storage to have persisting client-side data.

GameBox

GitHub: <https://github.com/RyanTheScholar/GameBox>

Website: <https://ryanthescholar.github.io/GameBox/>

Languages: JavaScript, graph.js, HTML, CSS and Bulma

Description: Used a Third-party API called RawG.io to pull game data from and portray the data on the page for general information. The functionality of the website allows the user to save games and search up specified games.

BookItBash (best project)

GitHub: <https://github.com/RyanTheScholar/BookItBash>

Website: <https://mighty-ocean-77874-d45330c8bb12.herokuapp.com/>

Languages: MERN Project (MongoDB, Express, React, Node) NextUI

Description: This project used ticket master API in order to provide concert/event ticket information to the user on search, some functionalities include a sign up and login modal and being able to save events that a user is interested (when logged in).

TECHNICAL SKILLS

Client-Side Technologies - HTML, CSS, JavaScript, jQuery, Responsive Design, Bootstrap, PWAs, React.js, Tailwind CSS, VITE, Handlebars, NextUI

Database Technologies - MySQL, MongoDB

Server-Side Technologies - RESTful APIs, JSON, AJAX (fetch API) HTTP request methods, GraphQL

Deployment and Delivery Technologies – Heroku, Git, GitHub Pages, Shell Scripting, Unit Testing, Linting, Continuous Integration

EXPERIENCE

Warehouse Associate

Aug 2022 – June 2023

TTI

Fort Worth, TX

In this role I learned how to communicate with individuals in a direct and descriptive manner that allowed all parties present to understand and achieve the needs of the company. New systems were developed and pushed into the warehouse constantly which pushed an adaptive mindset. Besides communication skills I dealt with problems on the technical side in order to keep up to date on the ever-changing layout and systems being introduced to the warehouse.

Daily tasks:

- found hot items inside our warehouse for customers, that needed an item to be expedited and received by the customer as soon as possible.
- Sorted inventory using a CLI program that is used globally in all TTI warehouses.
- In the program they had custom commands in order to access certain interfaces which house different data depending on the need of the user.

Technician

May 2020 – Dec 2020

The Furniture Pros

Fort Worth, TX
